WALLPAPERS

TECHNICAL SPECIFICATIONS

The wallpapers are produced in The Netherlands, digitally printed on high quality non-woven foundation that meets the highest standards of washability and fire resistance with special product features:

- Scratch resistant
- Contract qualities for hotels, restaurants, bars and other commercial use as well as domestic
- All our wallpapers are certified with the BS1, d0 (European) fire certification
- Washable surface
- Excellent image quality
- All designs are possible to manufacture in 7 fantastic qualities
- 100% non-pvc substrate
- No minimum order required
- Extra varnishing for greater durability
- Dimensionally stable without stretching or shrinking.
- Can be removed in a dry condition for redecoration, provided the appropriate paste has been used

Wallpaper orders come in rolls (50cm wide x 270cm height) which include the panels numbered one next to each other easy to unpack and install. Beyond the standard panel sizes our team can customize any design according to the client's needs. This is vital for both professionals and companies. Less waste but exact customized measures. Any other height than 270 cm can be proportionally reproduced by our design team to fit any space with artwork from the designers provided to make offers easier to place and faster to be approved.

Toner

Our wallpaper are digitally printed with QA-P dry toner for excellent image quality. QA-P toners also contain no hazardous chemicals, so they are compliant with the US and EU black lists, US-C-070928PROPIC-65 and UE Standard EN71-3 (heavy metals). Throughout the manufacturing process, serious consideration is given to environmental aspects: Equally important, our wallpaper are recyclable and biodegradable.

Fire-certification:

All our wallpaper are certified with the Bs1, d0 (European) fire-certification.

Aqua Acrylic is water based Natural latex - a milky fluid produced by the rubber tree. Non Woven means that additional to wood fibers our paper is reinforced with manmade fibers mixed in with pulp blend that acts like a mesh. Its purpose is to tightly bond the wood fibers together and make it extremely durable.

All our high-quality materials are printed using a non-woven backings that make the products noticeably stronger and more durable compared to normal wallpaper (paper backing). This makes our products dimensionally more stable to a degree that it will not stretch or shrink. The non-woven base is a fabric like material made from long fibers, bonded together by heat treatment.

TEXTURED WHITE

Material:	non woven with aqua acrylic sand top layer
Fire certification:	Bs1, d0 (European)
Weight:	185 grs /m2
Panel Width:	46.5 cm & 50 cm
